## **Friends of the Hubbard Center, Inc. Announce \$300,000 Grant Award**

Friends of the Hubbard Lake Center are proud to announce that the organization has been awarded \$300,000 “**Equipment and Programs**” grant from USDA Rural Development. This significant funding will support the continued enhancement of the new community center and library, expanding access to educational resources, technology, and community programs for residents of all ages.

The grant will be used to purchase essential furnishings and equipment, including bookshelves, tables, chairs, computers, desks, and materials needed to develop dedicated program areas. These improvements will directly support literacy, workforce readiness, youth programs, and community engagement.

This USDA Rural Development investment will strengthen the Centers’s ability to host educational workshops, tutoring sessions, community meetings, and youth enrichment activities. Residents will benefit from improved learning environments and increased access to technology and community resources.

Friends of the Hubbard Lake Center, Inc. extends heartfelt gratitude to Michigan State Representative Cam Cavitt’s office and United States Representative Jack Bergman for confidence and generosity in supporting long term community growth and opportunity.

Ann Gonsler
